

SHAIKH RAMISHA MALIYAT

SOFTWARE DEVELOPER | DATA ENGINEERING | BI & API INTEGRATION

Dhaka, Bangladesh | +880 1780 005688 | ramisha4627@gmail.com | ramishamaliyat.com

Career Objective

Software developer with hands-on experience in business application development, data warehousing, BI reporting and API integration, gained through an internship and more than a year in industry. Seeking a software or data engineering role where I can build reliable systems, work with clean and trusted data, and keep growing as an engineer in a collaborative team.

Core Competencies

- Business application development (C#, .NET, SQL Server)
- Data warehousing and pipeline automation (Big Query, SQL)
- BI dashboards and reporting (Looker)
- REST API design and system integration
- UAT, data validation and reconciliation
- Production deployment (IIS) and user support

Professional Experience

Software Developer

Bangladesh Lamps PLC

Jul 2026 - Present

Executive Software Developer

People's Scape Ltd, working at Bangladesh Lamps PLC

Aug 2025 - Jun 2026

Key responsibilities across both roles

- **Data warehouse:** Designed and automated a sales analytics data warehouse in BigQuery and SQL, covering sales, target, stock, collection and outstanding datasets with MTD/YTD calculation logic and scheduled refresh.
- **Performance:** Optimized SQL and BigQuery queries and procedures to reduce processing time and improve reporting responsiveness.
- **Data quality:** Validated data across source systems, the warehouse, reports and dashboards; investigated mismatches and corrected query and calculation logic.
- **BI reporting:** Built and maintained Looker reports, Looks and dashboards with filters and business logic for sales and field-force performance.
- **Applications:** Developed and enhanced internal business applications (invoicing, quotation and master-data workflows, bulk-processing utilities) using C#/.NET and SQL Server.
- **APIs and integration:** Built REST APIs for archive, synchronization and data processing with request validation and error handling; configured and troubleshoot QA and production integrations.
- **Deployment:** Recovered, configured (IIS) and deployed a production dashboard and a QR/barcode dashboard for factory operations, then resolved post-release issues.
- **UAT:** Ran requirement review, functional and data testing and full-cycle retesting for a secondary sales system, including its sales return module.
- **Support:** Supported about 225 field users and head-office teams with application, SAP, mobile, report and data issues, coordinating with other teams until resolution.
- **Documentation:** Documented APIs, warehouse logic, reports and deployment steps for future maintenance.

MIS & IT Intern

Transcom Electronics

May 2025 - Aug 2025

- Supported software testing and WordPress website updates.
- Modified SQL queries and contributed to business performance reports.
- Assisted with invoicing tasks and internal system improvements.

Projects

- **Canteen Management System:** Vendor and customer based canteen platform with an admin stock check report and Supabase database functions (RPC). Built with Next.js, TypeScript and Supabase.
- **Timr.MR, Global Time Platform:** Production web app with real-time clocks, timezone conversion, countdowns and calendar tools. Built with Next.js, TypeScript, Tailwind CSS and Framer Motion.
- **Transcom Electronics Chatbot:** AI support assistant answering product, policy and showroom queries, with Firebase logging and LLaMA 3 via the Groq API.
- **Autism Detection and Emotion Recognition (Thesis):** Deep learning system for autism detection and facial emotion recognition.
- **IoT Healthcare System:** Real-time maternal stress monitoring using IoT hardware.
- **Cloudways, Cross Cinema, Hotel Management, Orchid Fashion House:** Ticketing and management systems built with Java, HTML/CSS and SQL databases.
- **Introvert Bot, The Museum Project, Valley of Deterrent:** Arduino automation, a 3D virtual museum and an iGraphics game.

Technical Skills

Programming	C#, SQL / T-SQL, Python, C, C++
Backend and Web	ASP.NET, REST APIs, Next.js, TypeScript, Supabase, HTML/CSS, Tailwind CSS
Data and BI	BigQuery, SQL Server, MySQL, PostgreSQL (Supabase), Looker, Data Warehousing, Scheduled Automation
Delivery and Ops	UAT, IIS Deployment, QA/Production Configuration, Git, VS Code, Technical Documentation
Exposure	Flutter / Dart, Firebase, LLM APIs (Groq), Arduino
Office	MS Word, MS Excel, MS PowerPoint
Soft Skills	Communication, teamwork, problem-solving
Languages	Bengali (native), English (fluent)

Education

BSc in Computer Science and Engineering	2021 - 2025
Ahsanullah University of Science and Technology CGPA 3.349 / 4.00	
Higher Secondary Certificate (HSC)	2020
Viqarunnisa Noon School and College GPA 5.00 / 5.00	
Secondary School Certificate (SSC)	2018
Viqarunnisa Noon School and College GPA 5.00 / 5.00	

Certification, Achievements and Activities

Certification	Data Visualization with Looker, Coursera
Achievements	General-category scholarships in SSC and HSC
Activities	Member, AUST Innovation and Design Club and AUSTPC; Scout, Bangladesh Scouts
References	Available upon request
